

# OUTLINE FOR THESIS PAPER

ACKNOWLEDGEMENTS

TABLE OF CONTENTS

ABSTRACT

## 1- INTRODUCTION

1.1- History of Navigation

1.2- Development of Global Positioning System

1.3- Issues with Indoor Navigation

## 2- METHODOLOGY

2.1- Potential Solutions to Indoor Navigation

2.2- Global Positioning System Accuracy

2.21- Explain how GPS coordinates move to relative accuracy

2.22- Issues with GPS accuracy on iPhone

2.3- Pathfinding Algorithms

2.31- Using Pathfinding for Navigation

2.32- Different types of Pathfinding Algorithms

2.4- Pedometer

2.41- Explain pedometer

2.42- How does the iphone use Pedometer?

## 3- IMPLEMENTATION

3.1- Xcode and Swift

3.11- What is Xcode?

3.12- What is Swift?

3.2- Frameworks Utilized

3.21- What are Frameworks?

3.22- CLLocationManager

3.23- CMPedometer

3.3- Pathfinding in Swift

3.31 - Djstrika's Algorithm

3.32 - Creation of Vertex and Edges

3.33 - Creation of Adjacency Graph in Code

3.34 - How to access algorithm

3.4- Detecting Motion in Swift

3.41- Keeping Track of Steps

3.42- Implementation of CMPedometer

3.5- Implementation of Application

3.51- Virtual Storyboard

3.52- Implementation of Application

4- TESTING

4.1- Testing Accuracy

-Depends on how much testing/what types of testing accomplished

4.2- Results

4.3- Analysis of Results

5- CONCLUSION

6- REFERENCES
